A little bit about...

# Stan Roberts

For most of his life, Stan Robert's has simply enjoyed working with old tractors and farm memorabilia. What started as a small interest gradually grew into a collection that he never set out to become notable – just a gathering of machines he appreciated and wanted to keep from being lost to time.

Although his first tractor was a 1936 Silver King, he has always had a soft spot for Cockshutt tractors which were manufactured in Brantford Ontario. When Stan was a boy he and his parents often visited his grandfather and grandmother Drummond in Brantford and they often talked about Cockshutt tractors. Many years later his father Bill Robert's suggested he should consider collecting them as he had a fondness for them, especially because of their place in Canadian farm history. Over the years Stan found and cared for several models; Restoring some and preserving others just the way they were.

Stan's John Deere tractors earned their place too – steady, reliable and proudly carrying the green and yellow colours that so many farmers grew up with. The Ontario John Deere Club often had their annual meetings at Stan's warehouse.

As he now prepares to auction these pieces, he does so with pride. He hopes the next owners will enjoy them as much as he did, and that the tractors – Cockshutt, John Deere and many of the other brands including a very rare Porsche – will continue to be appreciated, used or displayed by people who value the history behind them.
